

## Super Box Swivel

### Super Box Swivel

**Forged steel with grade to customer's request**

**SWL reference customer's grade requested**

**Proof load reference customers grade requested**

**Weight reference customers required size (see table)**

**Super Box Swivel is a strengthened and improved version of the K Type Swivel. the primary use is with anchors, the removable pins either end allows the swivel to be attached directly on to the anchor shank or shackle as well as to the chain at the other side.**
