

TESSALink(RFID)

ONLINE

The TESSALink Online manager is a web application and database system that compiles item records and includes various reports and analytical functions. The TESSALink Desktop and TESSALink Mobile handheld applications interact with the item record for identification, inspection, and locating purposes. After uploading the gathered data to TESSALink Online, various dashboards and reports immediately notify you as to which items are due for inspection and exactly where they are located – these reports can be emailed at any time. You and your extended team can also retrieve historical inspection or certification information with printable reports. Reference any item documents, including inspection forms, test certs, material certs, photos, etc.

Item Details for: CHAIN CFX9877

Chip ID: 700900B3
 Asset Number: 3254
 Owner: DemoDistributor
 Operation Type: Certification
 Location Description: DemoDistributor (Root Loc.)

Item Attribute	Data
Work Order #	2342
Customer #	4
Customer Name	ABC
Closed Date	2006-11-28 10:29:00-07:00
Item Code	20
Item Description	Chain cfx9877
Product Class	44

Operation Details for: Chain Assembly Certification

Performed By: Tom Bamford
 Completed Date: 2006-11-28 10:29:35
 Work Order Created: No

Description	Result Data
